

Medhat Mohamed Abdelaziz Eleshmawy

Junior Penetration Tester

medhatelbaz2@gmail.com — LinkedIn — Egypt

SUMMARY

Junior Penetration Tester with hands-on experience in web application and network security testing through practical labs, cybersecurity training programs, and self-driven learning. Skilled in vulnerability assessment, reconnaissance, exploitation, privilege escalation, and security reporting. Familiar with OWASP Top 10 vulnerabilities and commonly used penetration testing tools including Burp Suite, Nmap, Metasploit, and Wireshark. Passionate about offensive security and continuously improving technical skills through practical labs and Capture The Flag (CTF) challenges.

EDUCATION

Bachelor of Computer Science

2020 – 2024

Mansoura University

EXPERIENCE

Penetration Testing Trainee

DigiLians Initiative & Ministry of Defense

- Completed practical penetration testing training focused on web application and network security.
- Performed reconnaissance, scanning, and enumeration using industry-standard tools and methodologies.
- Studied and practiced exploitation techniques for common web vulnerabilities including SQL Injection and Cross-Site Scripting (XSS).
- Conducted vulnerability assessments and documented findings with remediation recommendations.
- Gained hands-on experience with Burp Suite, Nmap, Metasploit, and Linux-based security environments.

TRAINING & PRACTICAL LABS

TryHackMe, Hack The Box & PortSwigger Web Security Academy

- Completed 50+ hands-on labs on PortSwigger Web Security Academy covering real-world web application vulnerabilities.
- Practiced exploitation of critical vulnerabilities including SQL Injection, Cross-Site Scripting (XSS), Authentication bypass, Access Control flaws, CSRF, SSRF, and File Upload vulnerabilities.
- Gained strong understanding of OWASP Top 10 vulnerabilities through practical attack scenarios and guided labs.
- Performed full penetration testing workflow including reconnaissance, enumeration, exploitation, and post-exploitation in lab environments.
- Used Burp Suite extensively for intercepting, modifying, and analyzing HTTP/HTTPS traffic during security testing.
- Developed ability to analyze vulnerable web applications and document findings with structured security reports and remediation steps.

PROJECTS

Web Application Penetration Testing Project

- Conducted a complete penetration testing engagement including reconnaissance, vulnerability identification, exploitation, and reporting.
- Discovered web application vulnerabilities based on OWASP Top 10 categories.
- Used Burp Suite to intercept, manipulate, and analyze HTTP requests and responses.
- Provided mitigation recommendations to improve overall application security.

TECHNICAL SKILLS

Penetration Testing: Web Application Pentesting, Network Pentesting, Vulnerability Assessment

Web Security: OWASP Top 10, SQL Injection, XSS, CSRF, File Inclusion

Tools: Burp Suite, Nmap, Metasploit, Wireshark, Gobuster

Operating Systems: Linux, Windows

Programming: Python, Bash

Networking: TCP/IP, HTTP/HTTPS, DNS, Network Fundamentals

Platforms: TryHackMe, Hack The Box

CERTIFICATIONS

- CompTIA PenTest+
- TryHackMe – Jr Penetration Tester Certificate
- TryHackMe – Web Fundamentals Certificate
- TryHackMe – Pre Security Certificate
- TryHackMe – Pre Security (Legacy) Certificate
- Cisco Networking Academy – Introduction to Cybersecurity
